

Amendments to the Claims: This listing of claims will replace all prior versions, and listings, of claims in the application

Listing of Claims:

1. (Currently Amended) An orally administered pharmaceutical composition comprising a spontaneous emulsion of cyclosporine, ethanol, polyoxyethylene glycerol trioleate, and an oil component.
2. (Original) The pharmaceutical composition of claim 1, wherein said cyclosporine is cyclosporine A.
3. (Original) The pharmaceutical composition of claim 1, wherein said cyclosporine is present at a concentration from about 5 to about 20% by weight.
4. (Original) The pharmaceutical composition of claim 3, wherein said cyclosporine is present at a concentration from about 8 to about 12% by weight.
5. (Original) The pharmaceutical composition of claim 3, wherein said cyclosporine is present at a concentration of 10% by weight.
6. (Original) The pharmaceutical composition of claim 1, wherein said oil component is ethyl oleate.
7. (Original) The pharmaceutical composition of claim 1, wherein said ethanol is present at about 15 to about 40 v/v%.
8. (Original) The pharmaceutical composition of claim 7, wherein said ethanol is present at about 15 to about 25 v/v%.
9. (Original) The pharmaceutical composition of claim 7, wherein said ethanol is present at 20 v/v%.
10. (Original) The pharmaceutical composition of claim 1, wherein said polyoxyethylene glycerol trioleate is present at about 20 to about 50 v/v%.
11. (Original) The pharmaceutical composition of claim 1, wherein said oil component is present at about 40 to about 65 v/v%.

12. (Original) The pharmaceutical composition of claim 11, wherein said oil component is present at about 55 to about 65 v/v%.

13. (Original) The pharmaceutical composition of claim 11, wherein said oil component is present at 60 v/v%.

14. (Currently Amended) An orally administered pharmaceutical composition comprising a spontaneous emulsion of cyclosporine, ethanol, polyoxyethylene glycerol trioleate and ethyl oleate in a weight ratio of cyclosporine, pure ethanol, polyoxyethylene glycerol trioleate and ethyl oleate of about 5:18:25.9:50.1 to about 15:16:23.1:44.9.

15. (Original) The pharmaceutical composition of claim 14, wherein the weight ratio of cyclosporine, pure ethanol, polyoxyethylene glycerol trioleate and ethyl oleate is 10:17.1:24.5:47.5.

16. (Original) The pharmaceutical composition of claim 15, wherein said composition upon dilution with an aqueous media at a ratio of 1 part composition to 100 parts aqueous media forms a spontaneous emulsion.

17. (Original) The pharmaceutical composition of claim 16, wherein said spontaneous emulsion comprises particles having a diameter of 50 to 185 nm.

18. (Original) A method of preparing an orally administered pharmaceutical composition comprising the steps of:

dissolving cyclosporine in ethanol to form a solution;

combining polyoxyethylene glycerol trioleate and an oil component with the solution to form a mixture; and

diluting the mixture with an aqueous media to allow formation of a spontaneous emulsion.

19. (Original) The method of claim 18, further comprising the step of gently mixing the diluted mixture to disperse the emulsion.

20. (Original) The method of claim 18, wherein the step of diluting further comprises diluting 1 part of the mixture with 100 parts of aqueous media.
21. (Original) The method of claim 18, wherein said oil component is ethyl oleate.
22. (Original) The method of claim 18, wherein said cyclosporine is cyclosporine A.
23. (Original) The method of claim 18, wherein the cyclosporine is present at a concentration of 10% by weight
24. (Original) The method of claim 18, wherein said ethanol is present at about 15 to about 40 v/v%.
25. (Original) The method of claim 18, wherein said polyoxyethylene glycerol trioleate is present at about 20 to about 50 v/v%.
26. (Original) The method of claim 18, wherein said oil component is present at about 40 to about 65 v/v%.
27. (Original) The method of claim 18, wherein said composition comprises cyclosporine, ethanol, polyoxyethylene glycerol trioleate and ethyl oleate in a weight ratio of cyclosporine, pure ethanol, polyoxyethylene glycerol trioleate and ethyl oleate of 10:17.1:24.5:47.5.
28. (Original) The method of claim 27, wherein said spontaneous emulsion comprises particles having a diameter of 50 to 185 nm.
29. (Original) The method of claim 28, wherein said spontaneous emulsion comprises particles having a diameter of 50 to 150 nm.
30. (Original) The method of claim 17, wherein said spontaneous emulsion comprises particles having a diameter of 50 to 150 nm.
